

zsh配置

安装zsh

代码块

```
1 sudo apt install zsh git wget  
2 chsh -s /bin/zsh # 将终端的默认shell改为zsh
```

然后安装oh-my-zsh

代码块

```
1 wget https://gitee.com/mirrors/oh-my-zsh/raw/master/tools/install.sh -O - | sh  
2 # 下载并安装GitHub上的zsh配置文件oh-my-zsh
```

安装常用的插件（高亮和补全）

代码块

```
1 git clone https://github.com/zsh-users/zsh-autosuggestions ${ZSH_CUSTOM:-~/oh-my-zsh/custom}/plugins/zsh-autosuggestions  
2 # zsh-autosuggestions是历史命令补全插件  
3 git clone https://gitee.com/Annihilater/zsh-syntax-highlighting.git  
${ZSH_CUSTOM:-~/oh-my-zsh/custom}/plugins/zsh-syntax-highlighting  
4 # zsh-syntax-highlighting是命令高亮显示，可以判断命令有无
```

最后配置.zshrc

代码块

```
1 vim ~/.zshrc  
2 找到这一行  
3 plugins=(git)  
4 改为  
5 plugins=(git zsh-autosuggestions zsh-syntax-highlighting)
```

如果出现命令输入卡顿的情况，就在 `/etc/wsl.conf` (如果没有就创建一个)中添加

代码块

```
1 [interop]  
2 appendWindowsPath=false
```

然后在PowerShell里运行 `wsl --shutdown`，问题解决，参考[这里](#)
